

# Ornamental Plants with Special Considerations

- Amelanchier (shadbush): Prune only to shape, as either bush or tree.
- Carpinus betulus (European hornbeam): Prune to tree form.
- Carpinus orientalis (Oriental hornbeam): Prune to tree form.
- Cassia fistula (golden-shower, senna): Cut back season's growth to short spurs after blooming.
- Cercis (redbud): Prune after blooming if necessary.
- Cornus florida, Cornus Kousa (flowering dogwood, Kousa dogwood): Prune as little as possible; heals slowly.
- Cotinus obovatus (American smoke tree): Prune to grow as bush or small tree; cut off fading flowers.
- Crataegus (hawthorn): Prune to shape in late winter, renew branches if necessary;
- Elaeagnus Qlussian olive): Prune only to control size, if necessary, in late winter.
- Euonymous atropurpurea (burning bush): Prune in late winter, only if necessary.
- Franklinia alata (Franklin tree): Prune to tree form.
- Halesia monticola (silver-bell): Needs pruning rarely.
- Hydrangea paniculata 'Grandiflora' (peegee hydrangea): Prune in late winter.
- Koelreuteria paniculata (golden rain tree): Prune to shape when young.
- Laburnum anagyroides (golden chain): Prune after blooming.
- Magnolia (magnolia): Prune just after blooming.
- Malus (flowering crab apple): Prune to shape, renew old wood if necessary.
- Myrica cerifera (wax myrtle): Prune to remove winter injury, or to shape, in late winter.
- Myrica pensylvanica (bayberry): Prune to remove suckers, winter injury.
- Oxydendrum arboreum (sourwood): Needs pruning early.
- Prunus (flowering almond, apricot, cherry, peach, plum): Prune to shape in late winter.
- Rhamnus davurica (buckthorn): Prune to shape in late winter.
- Sorbus (mountain ash): Prune to tree form in late winter.
- Symplocos paniculata (sweetleaf): Prune to shape, renew old branches.
- Syringa reticulata (Japanese tree lilac): Prune right after blooming, if necessary.
- Viburnum (cranberry bush, nannyberry, black haw): Prune in late winter only, as necessary.
